

STAFF DEVELOPMENT

Staff development should be a collaborative effort among the members of the school community consisting of all employees of the school district and school board members.

The school board supports and expects current and effective practices necessary for quality education. To achieve this goal, the school community will promote the use of research-based techniques and empower staff to make decisions regarding their own professional growth. The Professional Development Team will design a long-range plan for meeting school goals that is monitored, assessed, and revised annually.
