

MISSION STATEMENT

The mission of Merton Schools is to provide an educational environment that develops a life-long love of learning. We will accomplish our mission through the development of educational opportunities in which the skills and abilities of each student are maximized, the self-esteem of each student is enhanced and supported, and the social development of each student is strengthened. Merton's staff will incorporate an academically and artistically challenging curriculum through the use of quality materials, taking advantage of continuing educational opportunities to establish this environment. Learning will take place in a safe and comfortable physical setting. Students, parents, staff, and the community will share the responsibility of promoting positive student growth by communicating openly and working together cooperatively. The result will be the development of responsible citizens who will experience success in a changing society and who will contribute positively to their communities.
